# 2009 Minnesota Concrete & Masonry Contractors Association

## From the President

The 2009 Annual Excellence in Concrete & Masonry Design & Construction Awards ceremony is a time to honor all the structures designed and built with concrete and masonry material by our trained and talented hands; this year's event is no different.

With the current economic situation, we are continuing to build quality structures with concrete and masonry, as indicated with over 50 outstanding entries this year! Thank you for consistently promoting the use of concrete and masonry; all of these structures demonstrate that working together we can continue to build a historical Upper Midwest out of the same materials that have been used over hundreds of years.

This past year has marked a special time with the MC&MCA, the MCMA and NCCC - A Division of PCA pulling together to reach a common goal: recapture and maintain market share for commercial and residential masonry construction. Through our past Presidents' visions and efforts, Todd Frantz, William Dentinger III and Frank Grazzini, the Midwest Masonry Promotion Council (MMPC) has been formed. MMPC's objective is to find creative and effective ways to reach key decision makers early in the design process and educate them of the multiple advantages of masonry construction.

With green technology taking a lead role in the construction industry, our concrete and masonry products are more viable to being utilized in our marketplace. During these recessed times, this movement is intense and will open up new opportunities for us in the near future.

As we move forward, I'd like to thank our contractors, suppliers and the employees that build with quality and pride in mind. We look forward to partnering for many years to come.

Sincerely,

Rick Morris  
President
