2011

Minnesota Concrete & Masonry Contractors Association Awards

Excellence in Concrete & Masonry Design and Construction Awards

From the President

The most treasured buildings in the world are built out of concrete and masonry. It is not surprising due to their ability to withstand the elements, abuse and their timeless beauty. Like those before them, today's Architects, Designers, and Engineers still recognize these same features. Modern Design teams are forced to build with much tighter and tougher environmental concerns, yet they still lean on the time tested materials of concrete and masonry.

While technology and advances in equipment have changed some of the techniques to build these landmark buildings, one thing that has not changed is the pride that we take in building them. In May, it will be 30 years that I have been a mason. I still remember the feeling of pride that came over me as I walked away from the wall at the end of my first day. I had helped build a wall with my own hands that would be there for decades and decades. Few things match the feeling of pride you get when you show your children a building you built 30 years ago.

The Designers feel this same pride. Without the creative talents of the Architect/Designer as part of the team it wouldn't work. As Craftsmen we thank them for our opportunities.

With its 30th annual Excellence in Concrete and Masonry Design & Construction Awards, the MC & MCA honors those that design and build today's landmarks. We know that the materials used and the pride that they are built with can stand the test of time.

If you would like to learn more, contact Executive Director Gary Botzek at 1711 W. County Rd. B, Suite 207S, Roseville, MN 55113, (651) 293-0892, or visit our website at www.mcmca.com.

Sincerely,

William C. Dentinger
